25% in savings for the average project from custom created solutions tailored to your exact needs.

Eco-friendly materials, that appeal to environmentally conscious consumers

Easy Installation with pre-cut materials reducing construction time and complexity.

12 week delivery from order confirmation with 24 hour turnaround on quotes.

Product Specifications

Cut to Size: Precision cutting to meet your project's specific needs, eliminating the need for onsite cutting, reducing labor and product waste management costs.

Sustainability: Extruded from recycled materials, our products contribute to a zero-waste process, aligning with your sustainability goals.

Cost Savings: Our innovative manufacturing process saves an average project 26% in costs.

Durability and Maintenance: Strong resistance to UV/weather, pests, and rot ensuring a longer lifespan with minimal maintenance.

Testimonials

Client 1

"We have been working with COEN on their Modular Building program for 12 months now, using the cut to length decking and screening. The savings have translated to pure bottom-line profits. The reduced time to install and minimal waste, allows us to utilise our manpower more effectively"

Client 2

"Working with the team at COEN has been a great experience. From their environmental, factory ISO and AS/NZS certification, the continuous improvement and product application reviews have been outstanding. These services have added a positive effective for our modular production efficiencies, profitability and our client requirements for a greener product."

Case Studies

Typical 4.2m x 3m Deck		1 x Deck	20 Decks
# of Boards / deck	22	\$2,112*	\$42,240.0
Cost savings			
Waste / board	1.2m	\$469.26	\$9,385.2
Time to cut down 22 boards	33 mins	\$43.90	\$878.0
Site waste management	7mins	\$9.31	\$186.2
Waste cartage	122Kg's	\$16.65	\$333
Cost savings / deck		\$539.12	\$10,782.4
*Based on standard project pricing			25.5% cost saving
